The Parathyroid Hormone (PTH) Day in chronic kidney disease (CKD) From Bench to Bedside

Paris, France
September 8, 2017

Dear Colleagues,

We would like to draw your attention to the upcoming educational event The parathyroid hormone (PTH) day in chronic kidney disease (CKD) from bench to bedside to be held in Paris (France), on September 8, 2017 and organised by CKD-MBD Working Group.

The CME course is entirely dedicated to PTH and it is divided in four sessions, the two first are focused on basic science and the last two are more clinical oriented. The educational event is addressed to nephrologists and physicians interested by bone metabolism to get a timely update of the new and unexpected PTH actions.
